Release Notes

v1.0	Mar 11 2014	Tiffanie Shakespeare	New spec using Jacqueline's work as basis

Open Issues

None

User Stories

As a user, I want to set a ringtone by using a song from the Music app and I want to have that ringtone appear in the list of available ringtones on my phone.

As a user I want to be able to delete ringtones that I do not want anymore.

As a user, I want to be able to create a new ringtone from any audio file downloaded from the browser.

As a user, I want to be able to share my ringtones (non-locked) with my friends via NFC, bluetooth, MMS or email.

As a user, I want to be able to select custom ringtones for any of my contacts (to assign a ringtone to one or more contacts), so that they can recognize the caller and decide what to do with the call based on audible cues/without looking.

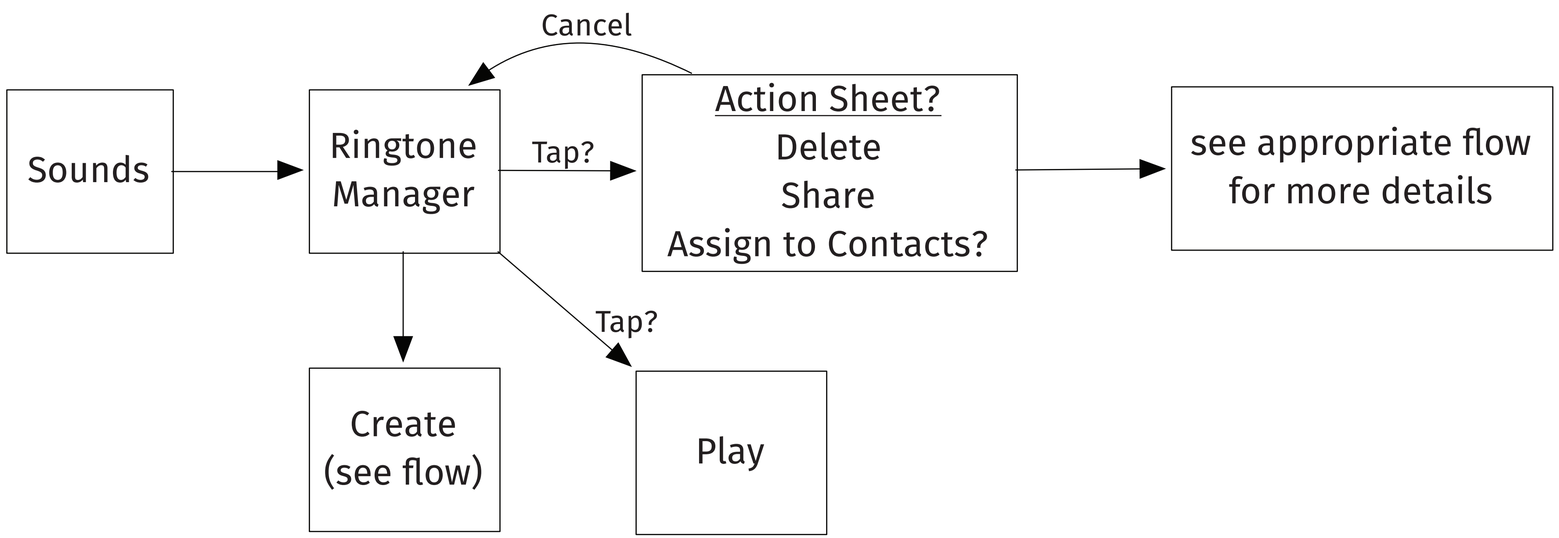
As a user, I want to be able to pick from my list of ringtones to define a clock alarm.

~~As a user, I want to be able to easily customize my ringtones by downloading some kind of theme or ringtone pack from the Marketplace.~~

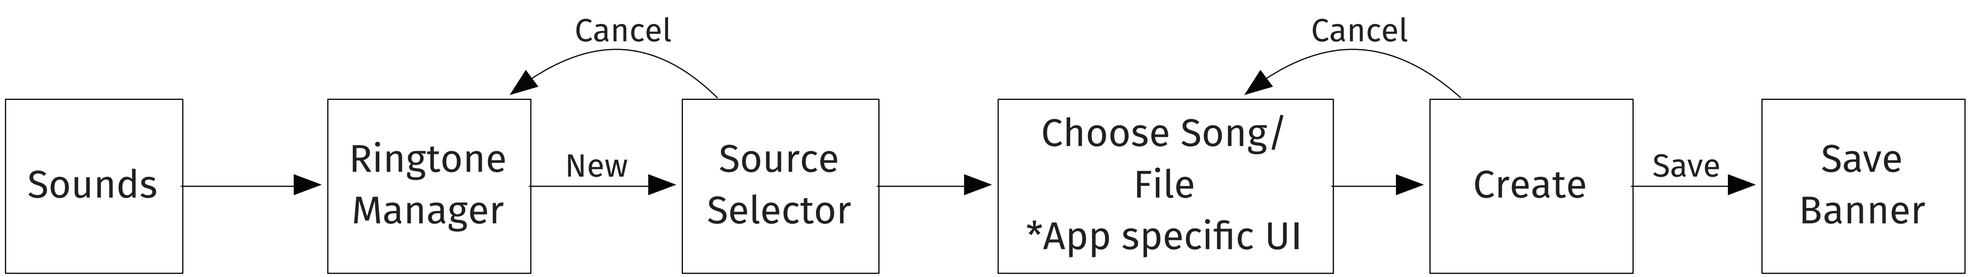
~~As a user, I want to be able to "crop" an audio file when creating a ringtone, so that I can select just a portion of the file to be played.~~

IA Diagrams

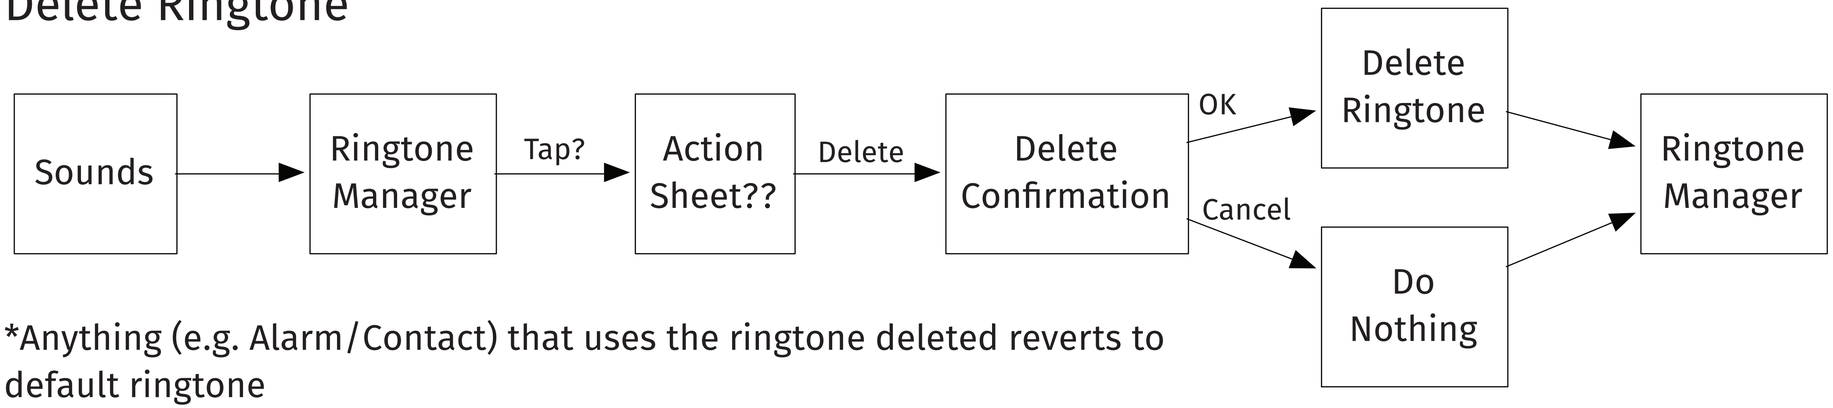
Manage Ringtone



Create Ringtone

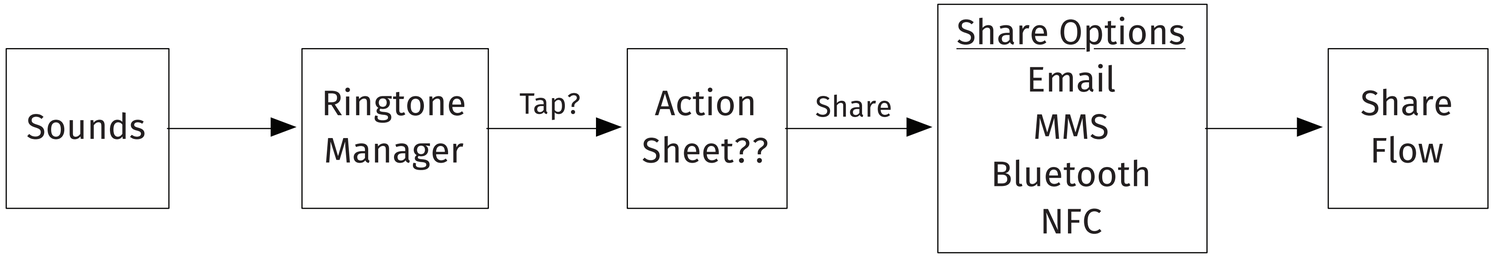


Delete Ringtone

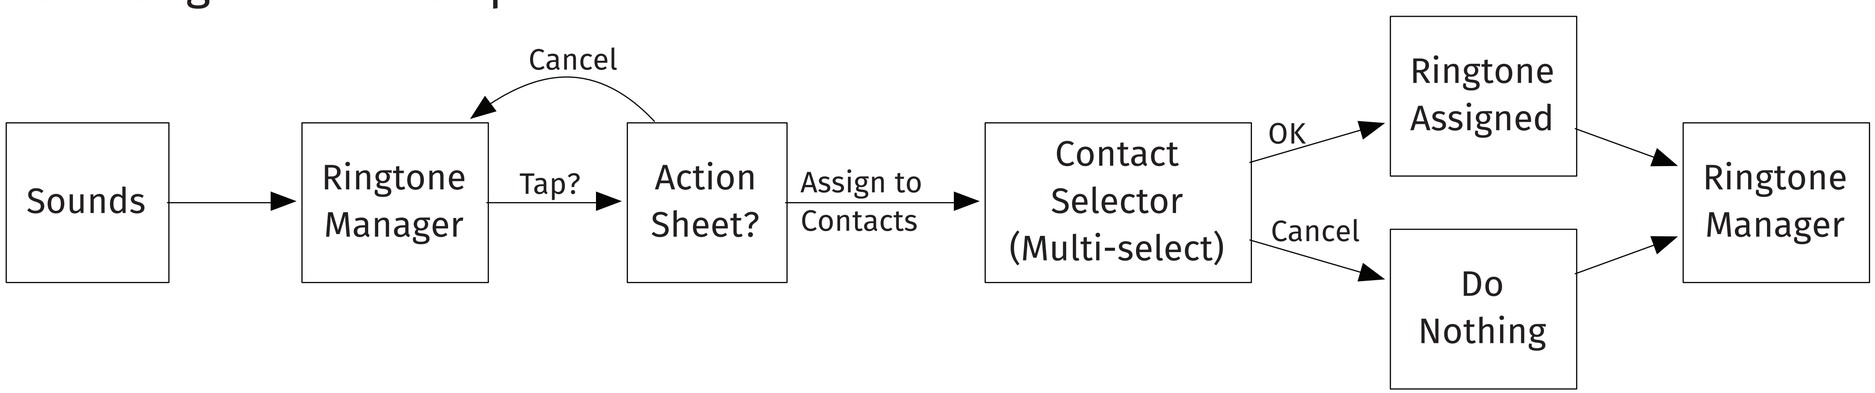


*Anything (e.g. Alarm/Contact) that uses the ringtone deleted reverts to default ringtone

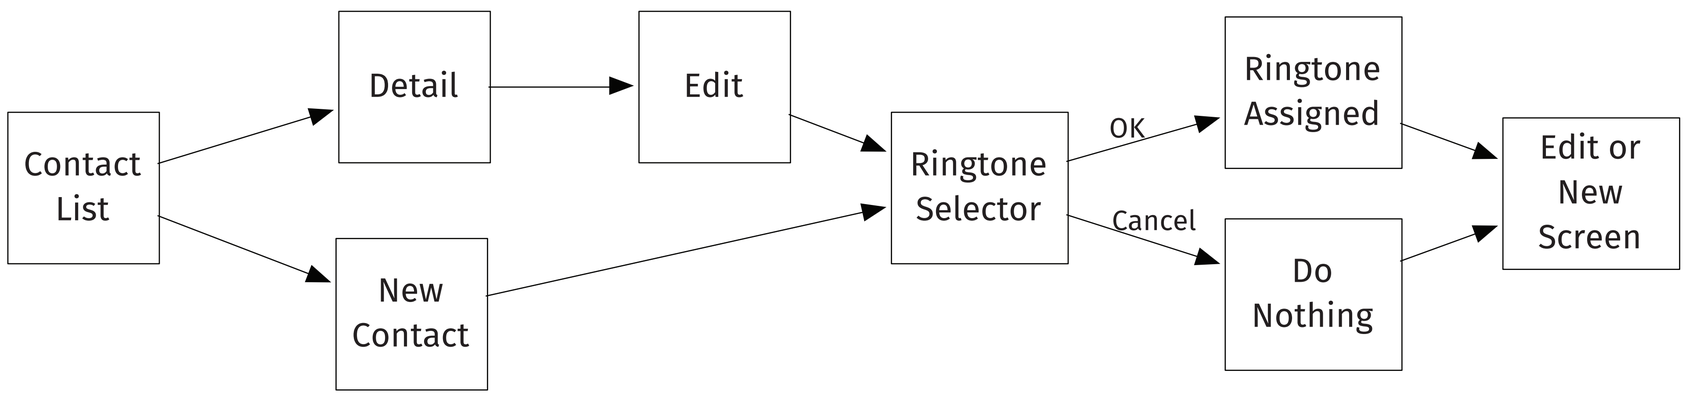
Share Ringtone



Add Ringtone to Multiple Contacts

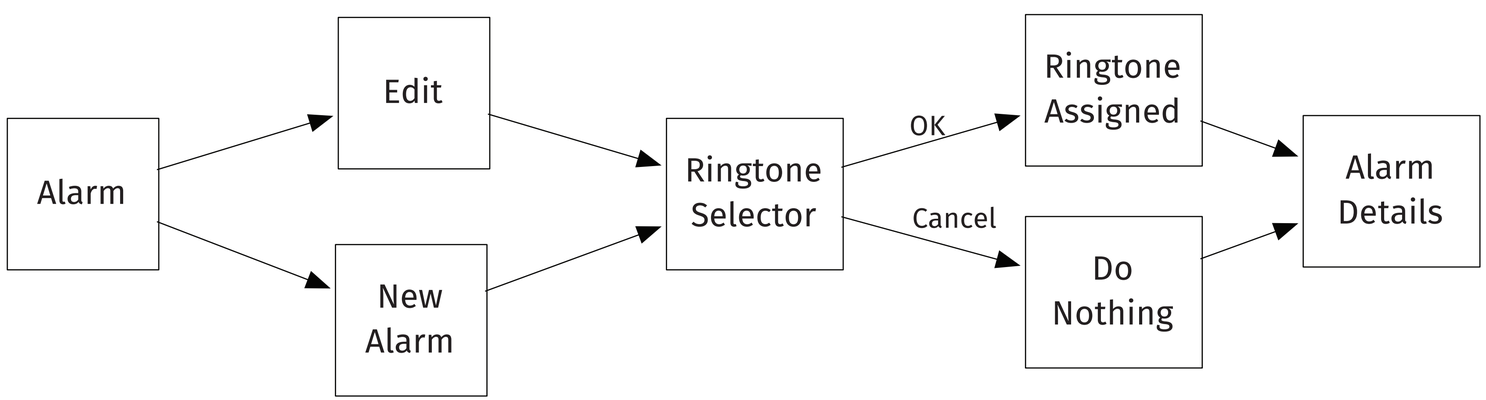


Add Ringtone to Single Contact



* Currently we don't have group functionality so ringtones can only be assigned individually.

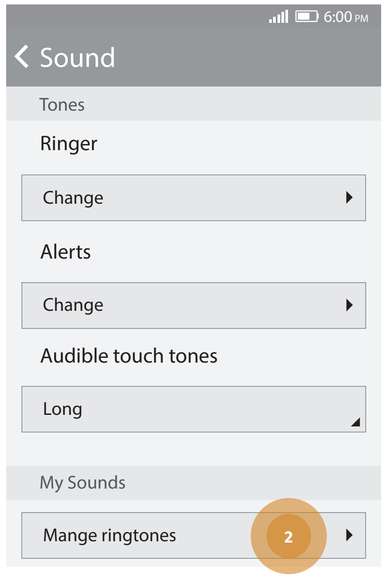
Add Ringtone to an Alarm



Ringtones in Settings

Manage Ringtones

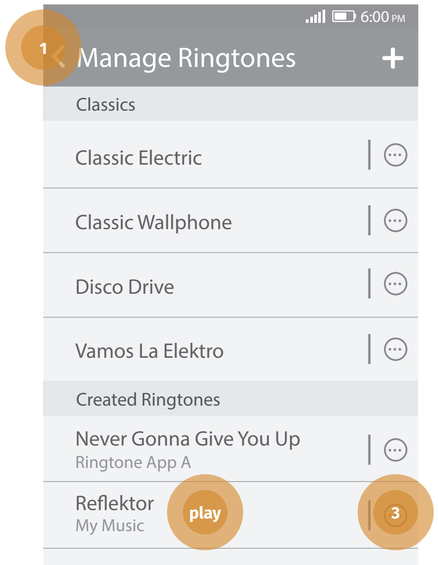
1. Settings -> Sounds



A new section is shown in Settings-> Sound where the management of ringtones can be performed.

Final Strings TBD - check capitalization

2. Ringtone List



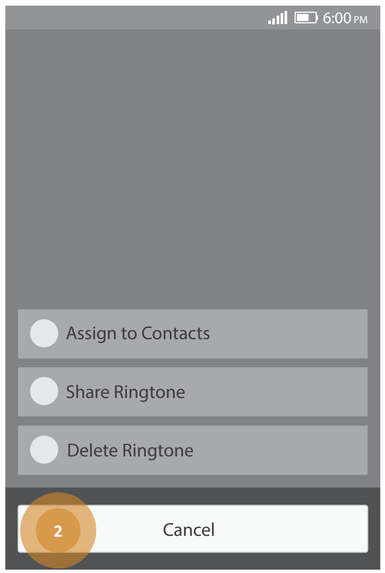
Tapping shows a complete list of ringtones divided into alphabetical sections; those created by the user and pre-installed system ringtones. Only populated sections should appear.

For those created by the user, a 2nd line is shown with additional info.

Here the user can either tap on a ringtone to play or tap on the “more” icon to reveal an action sheet.

Tapping back returns to the Sound Setting page.

3. Additional Options Action Sheet



Tapping the “more” icon shows an action sheet with additional actions.

The user can either select an action or cancel to return to the list.

Only available actions are shown, if there are no actions for a ringtone, the “more” icon should not be shown for that ringtone.

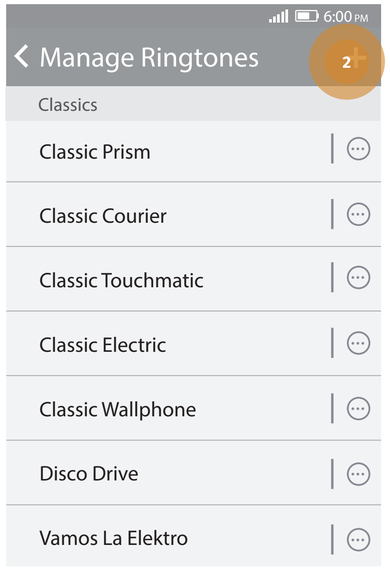
Ordering is TBD

ACTION FLOWS

See following pages for flows regarding these actions.

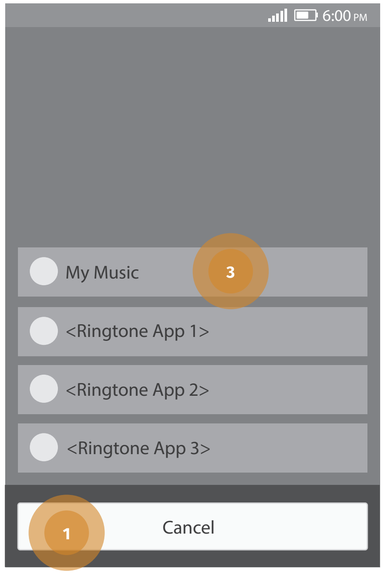
New Ringtone - No Editing/Cropping

1. Ringtone List



Ringtone list.

2. Action Sheet



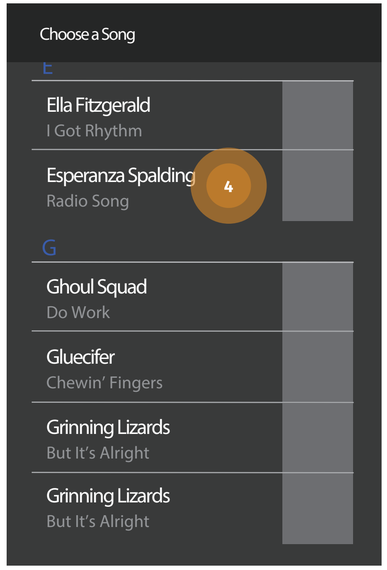
Tapping on the new icon will first show an action sheet. This action sheet lists available sources of music/audio files the user can choose to create a ringtone from.

Tapping cancel returns to the list with no other action taken.

If My Music is the only source, this step should be skipped.

My Music should be listed first followed by the other sources in alphabetical order.

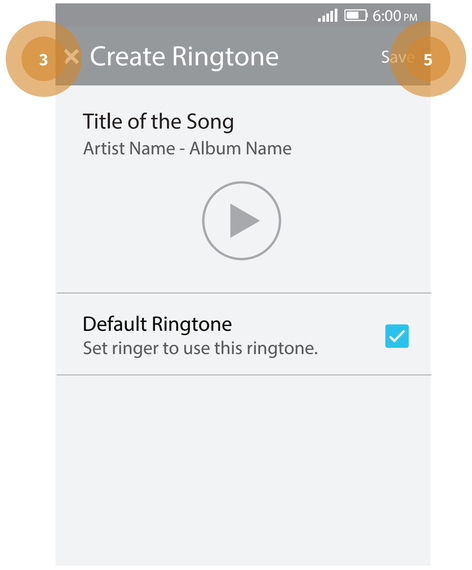
3. My Music List



Selecting the source will then provide the user to select an audio file.

This UI is provided by the app.

4. Create Ringtone



Tapping a song selects the song to create the ringtone.

The user can see the song information to confirm the selection and also play the song.

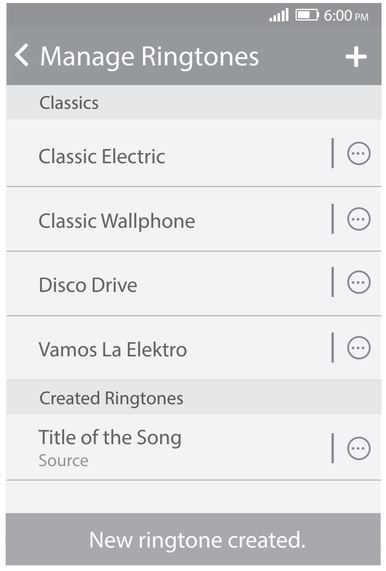
The user also has the option to make the ringtone they are creating the default ringtone. This option is defaulted to checked.

The title of the song or filename becomes the ringtone name. If the the file name already exists, the file should auto-increment by one. e.g Reflektor (1).

Cancel should go back to song/file selection.

strings TBD

5. Ringtone Saved



Title of the Song set as ringtone.

Tapping save creates and saves the ringtone. The user is returned to the ringtone list, which is updated with the new ringtone.

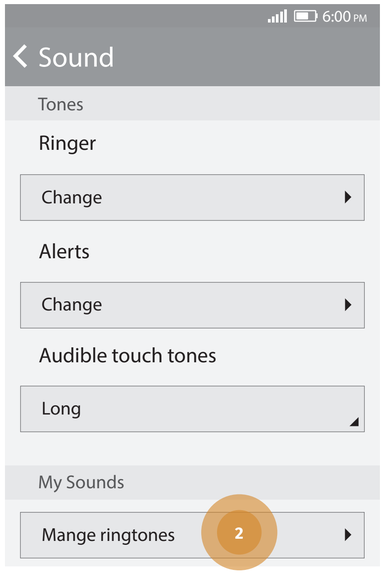
If the user created section didn't appear previously, it should now appear.

A banner is also shown to confirm the save. Text depends on if it is to be set as the default ringtone (setting in previous screen).

strings TBD

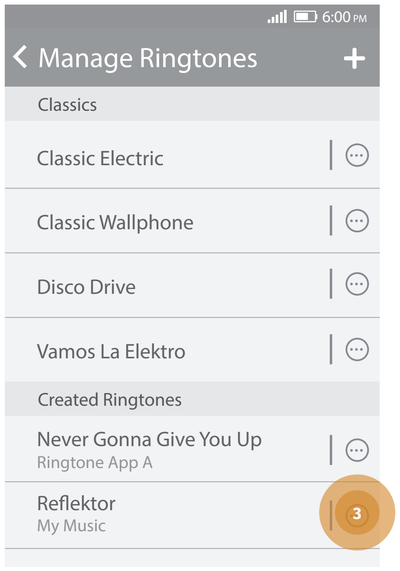
Delete Ringtone

1. Settings->Sounds



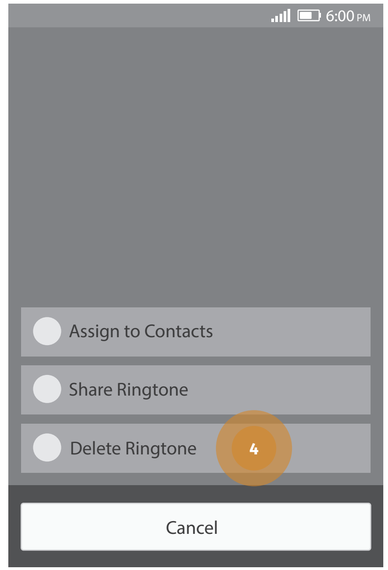
Sound settings.

2. Ringtone List



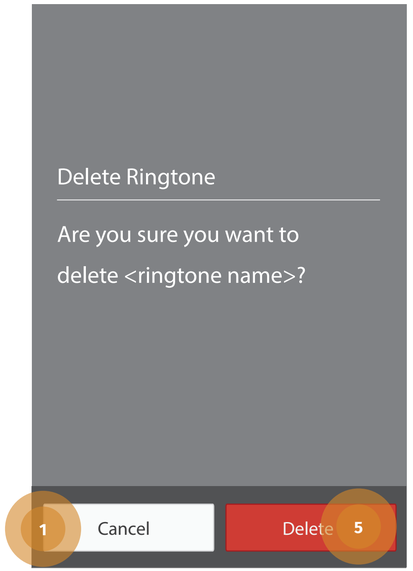
Ringtone list.

3. Action Sheet



Additional actions the user can take on the ringtone.

4. Delete Ringtone



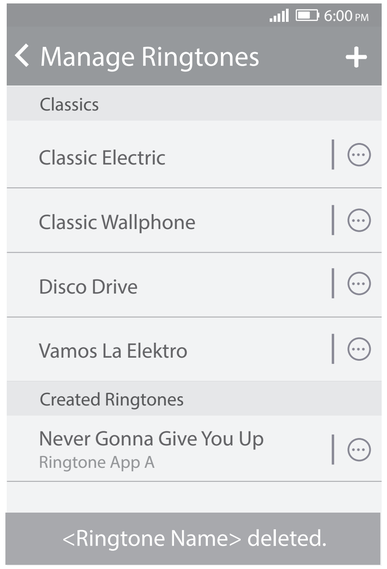
Tapping first presents the user with a confirmation before deleting the ringtone.

Delete continues with the action.

Cancel returns to the ringtone list with no further action taken.

strings TBD

5. Ringtone Deleted



The ringtone is deleted and the list is updated to remove the ringtone.

A banner is also shown to confirm the save.

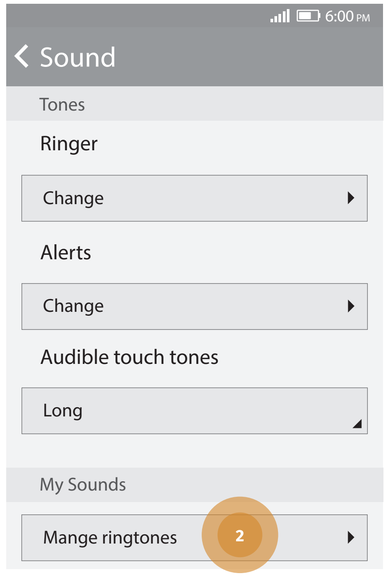
If the ringer setting is set to a ringtone that is deleted, the ringer should revert to the default for FTU.

Major Issue for Contacts/Alarms:
Currently a copy of the ringtone is created and used within the app. If the ringtone is deleted, the copy will remain. Thus if set for 10 contacts, the user will still hear the ringtone despite deleting it. To resolve, the user would have to go into each contact and change the ringtone to something else before the copy can be deleted.

If Contacts/Alarm user stories are implemented, this must be resolved.

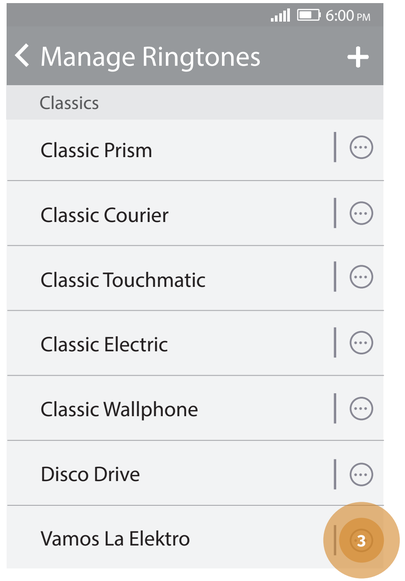
Share Ringtone

1. Settings->Sounds



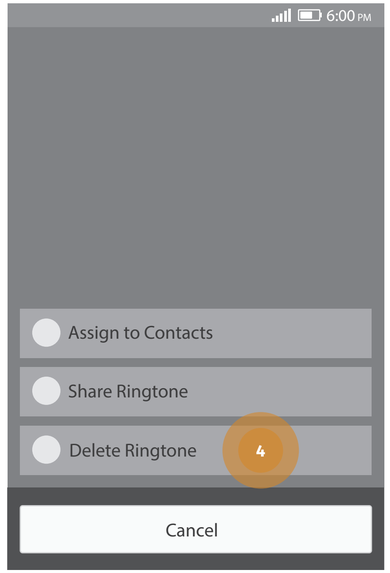
Sound settings.

2. Ringtone List



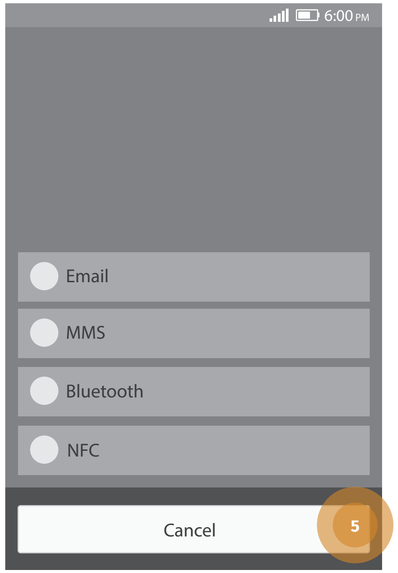
Ringtone list.

3. Action Sheet



Additional actions the user can take on the ringtone.

4. Share Action Sheet



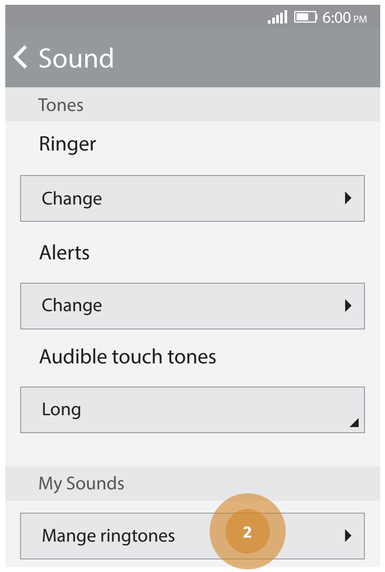
Tapping share presents the user with a list of available methods to share the ringtone.

SHARE FLOW

Use current UI/flows for sharing options.

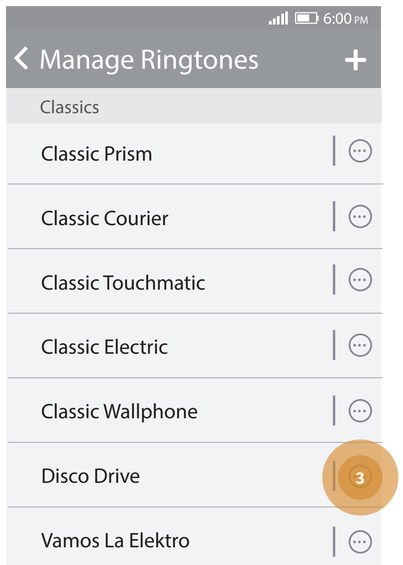
Assign Ringtone to Multiple Contacts

1. Settings->Sounds



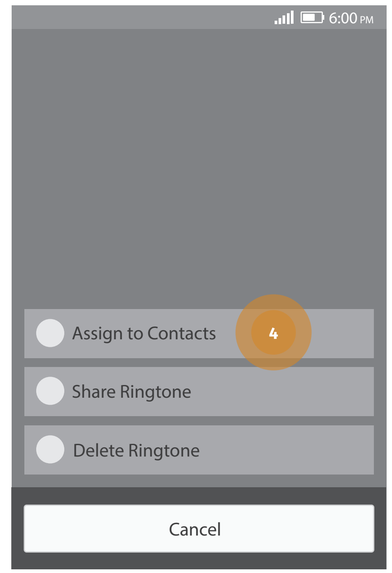
Sound settings.

2. Ringtone List



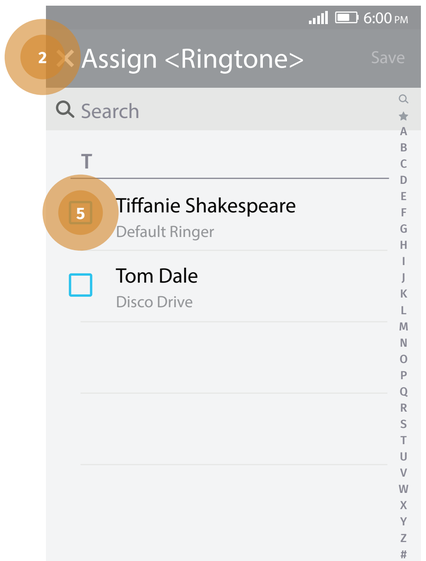
Ringtone list.

3. Action Sheet



Additional actions the user can take on the ringtone.

4. Assign to Multiple Contacts



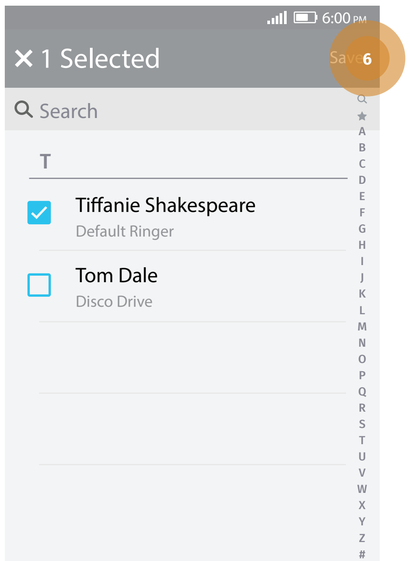
Tapping shows a picker where the user can choose many people to assign the ringtone. Search and quick jump should be available to help the user quickly find people.

A second line is displayed showing the current ringtone set for the user.

Save is disabled until at least one person is selected.

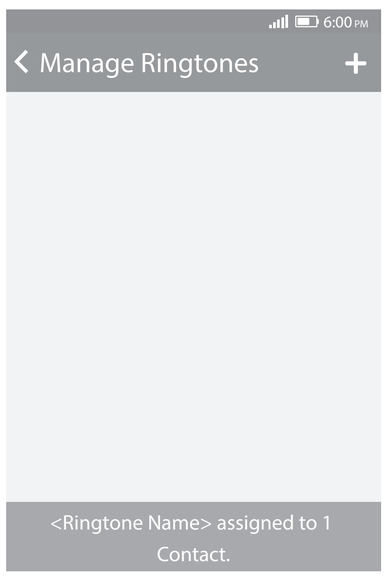
Tapping cancel returns to the list with no further action taken.

5. Contact Selected



Header text updates when one person is selected - the number reflects the number of contacts selected.

6. Ringtones Set



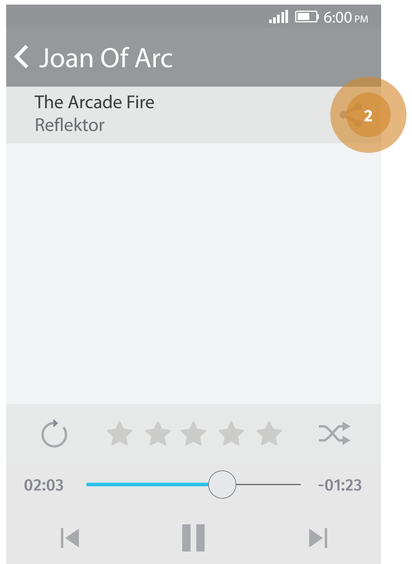
Tapping save, changes the ringer setting for the selected contacts.

The user is returned to the ringtone list and a confirmation banner is shown.

Other Apps & Ringtones

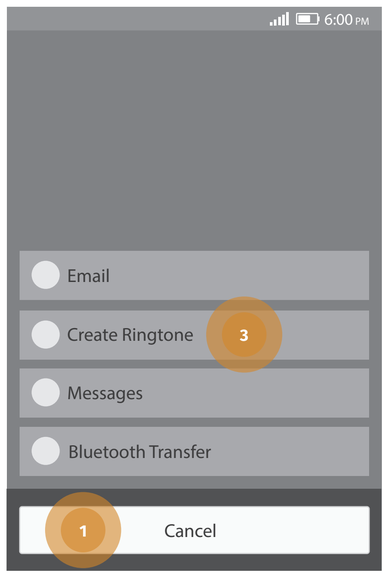
New Ringtone - From Music App

1. Music App - Now Playing



Current music app - now playing view.

2. Action Sheet

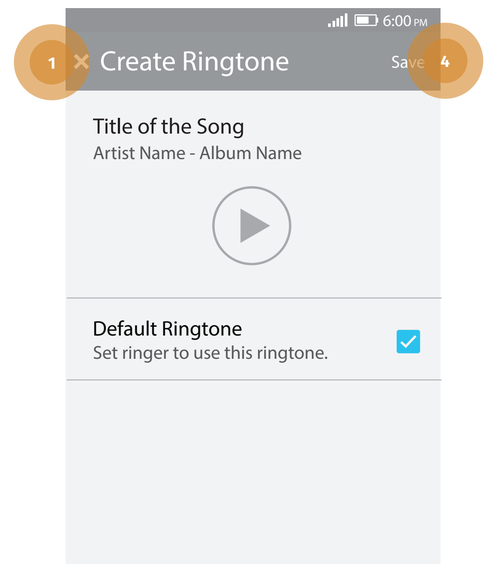


Tapping the share icon shows an action sheet revealing more actions that can be taken.

One of these options is to create a ringtone from the song currently playing.

Tapping cancel returns to the now playing screen with no further action.

3. Create Ringtone

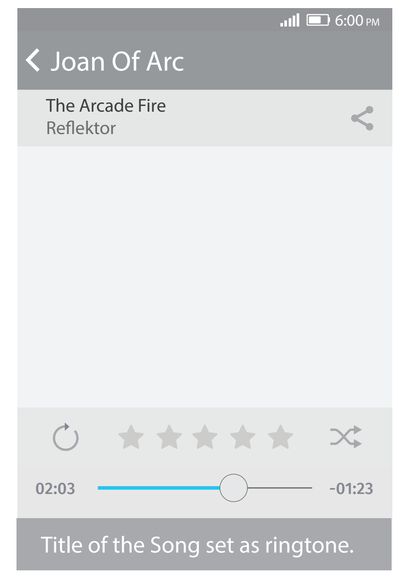


Same behaviours/UI as the create new ringtone flow.

Tapping cancel returns to the now playing screen with no further action.

strings TBD

4. Music App - Now Playing



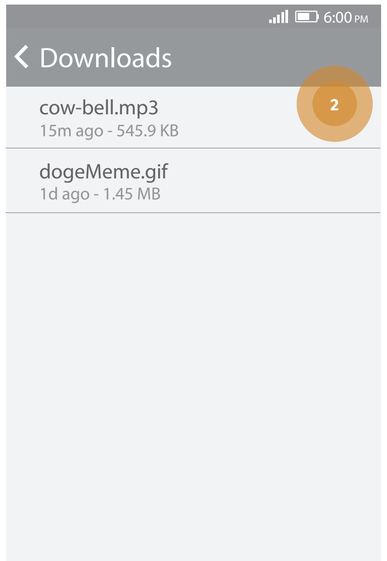
New ringtone created.

Same behaviours/UI as the create new ringtone flow.

strings TBD

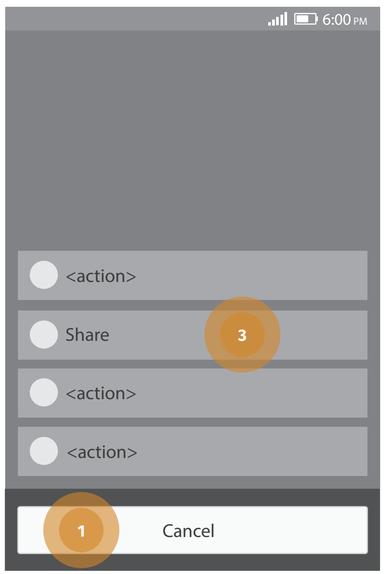
New Ringtone - From Download Manager

1. Download Manager



Download manager

2. Action Sheet



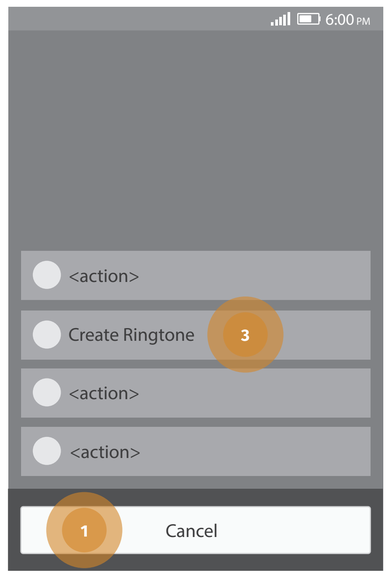
Tapping on the download shows an action sheet revealing more actions that can be taken.

One of these options is share.

Tapping cancel returns to the download manager with no further action.

final order TBD

3. Create Ringtone



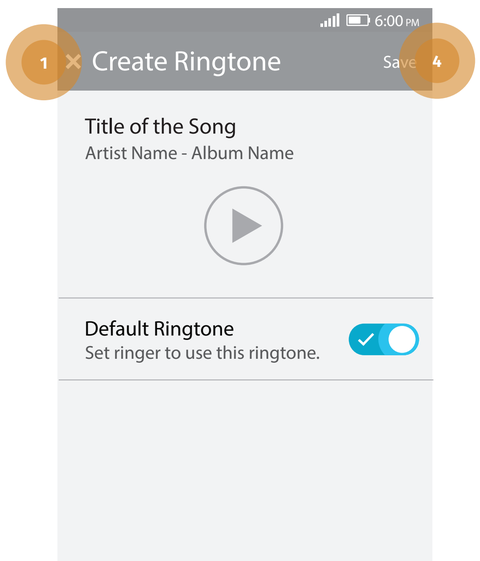
Tapping share shows an action sheet revealing more actions that can be taken.

One of these options is to create a ringtone from the song currently playing. Only show this option if the file is able to be saved as a ringtone.

Tapping cancel returns to the download manager with no further action.

final order TBD

4. Music App - Now Playing

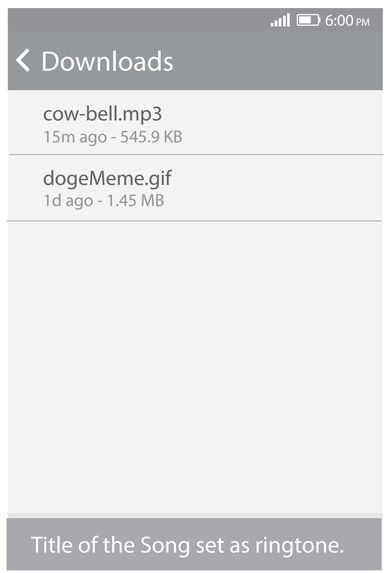


Same behaviours/UI as the create new ringtone flow.

Tapping cancel returns to the now playing screen with no further action.

strings TBD

4. Music App - Now Playing

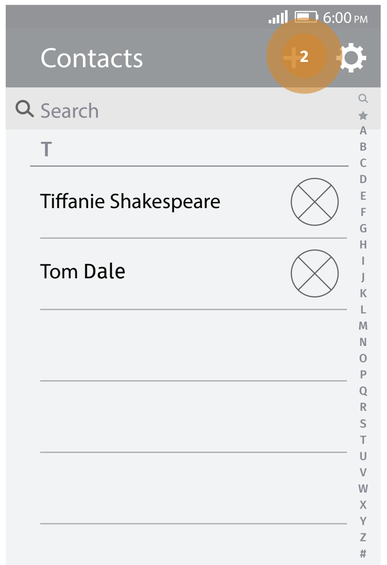


Same behaviours/UI as the create new ringtone flow.

strings TBD

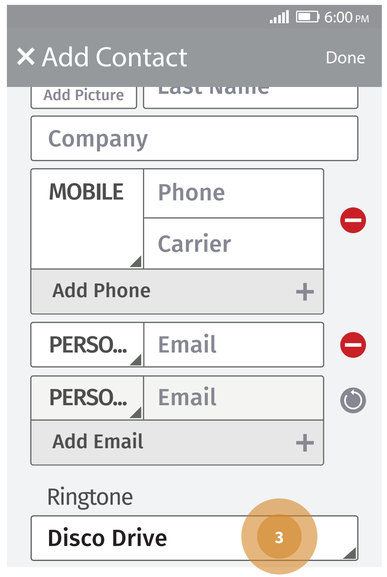
Contacts - Assign Ringtone to New Contact

1. Contacts



Contacts app.

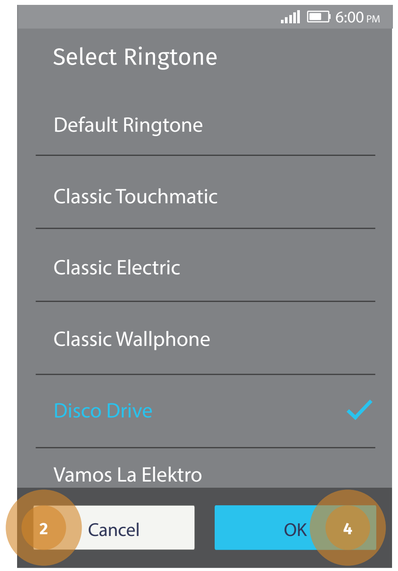
2. New Contact



New contact form. A new field is added between email and comment fields.

Unless changed by the user, the default should be the ringer setting. Otherwise the current setting is reflected.

3. Value Selector



Tapping shows a value selector with possible ringtone options. The current option is selected.

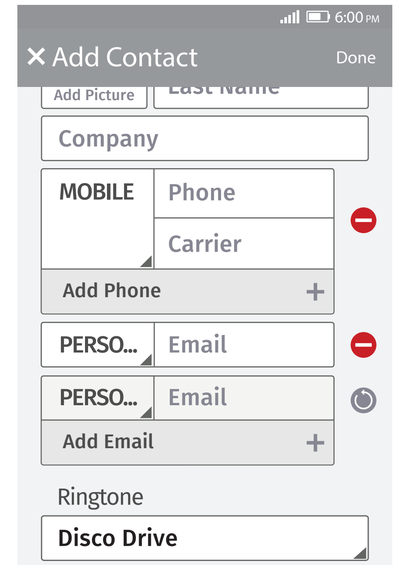
An option to use the default ringtone setting is at the top of the list.

OK changes the ringtone for the contact. Cancel returns to the form with no changes.

What kind of customizations can we make to this dialogue:
- sections for alert tones
- preview ringtone

What are the requirements for 1.5? Media ringtones team needs work session with Contacts team.

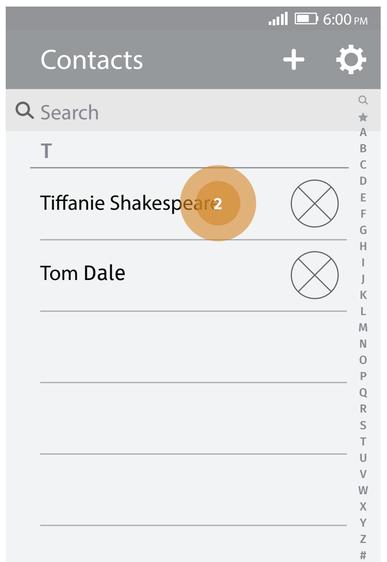
4. New Contact



Tapping saves the changes and updates the selector with the current selection.

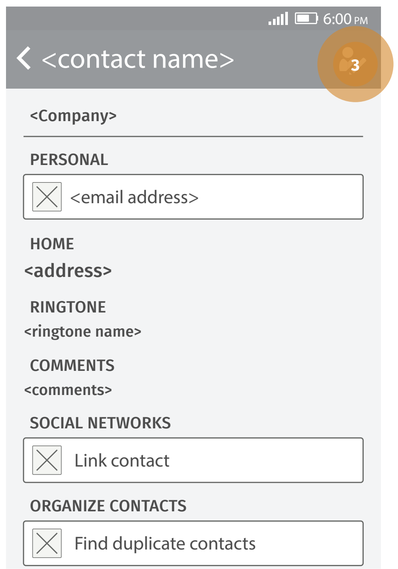
Contacts - Assign Ringtone to Existing Contact

1. Contacts



Contacts app.

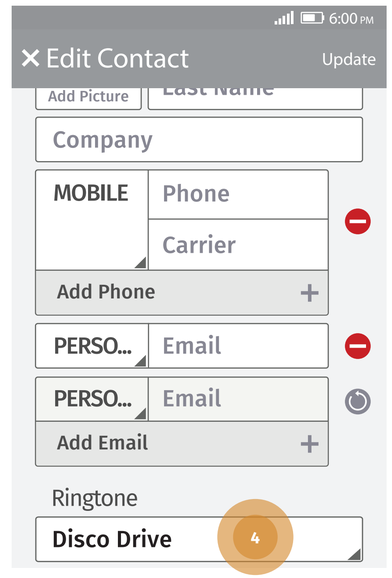
2. Contact Details



Contact details of the selected contact.

Unless changed by the user, the default should be the ringer setting. Otherwise the current setting is reflected.

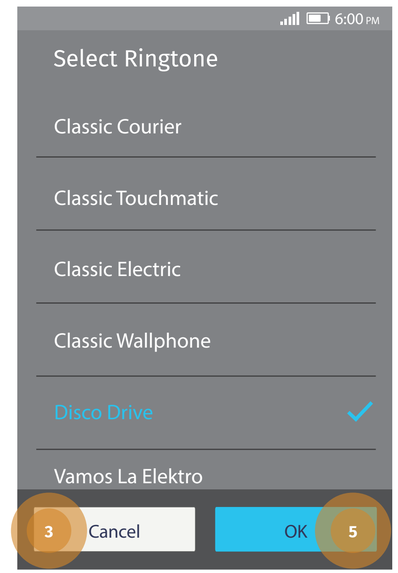
3. Edit Contact



Editing a contact form. A new field is added between email and comment fields.

Unless changed by the user, the default should be the ringer setting. Otherwise the current setting is reflected.

4. Value Selector



Tapping shows a value selector with possible ringtone options. The current option is selected.

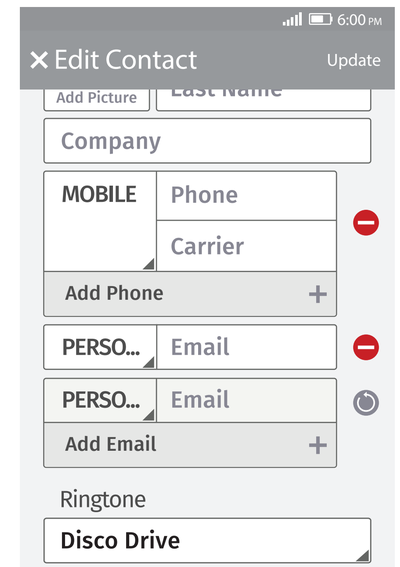
An option to use the default ringtone setting is at the top of the list.

OK changes the ringtone for the contact. Cancel returns to the form with no changes.

What kind of customizations can we make to this dialogue:
- sections for alert tones
- preview ringtone

What are the requirements for 1.5? Media ringtones team needs work session with Contacts team.

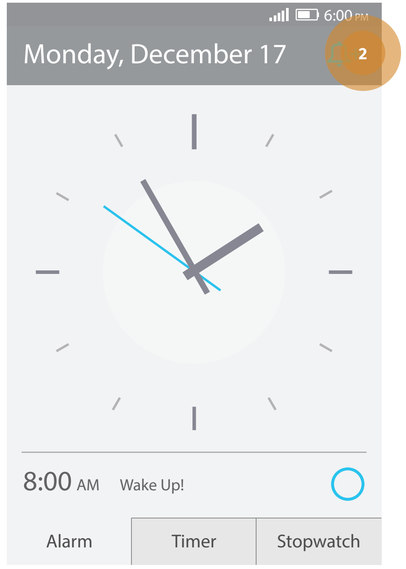
5. Edit Contact



Tapping saves the changes and updates the selector with the current selection.

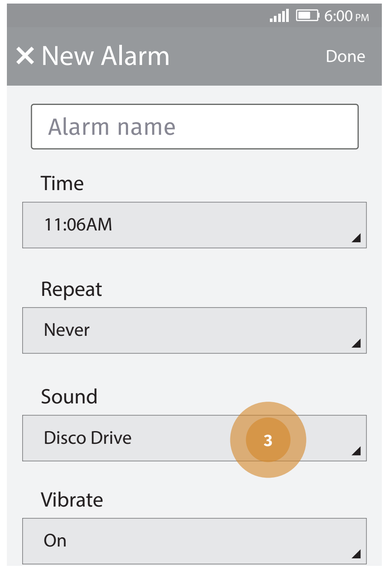
Alarm - Assign Ringtone to a New Alarm

1. Alarm



Clock app.

2. New Alarm

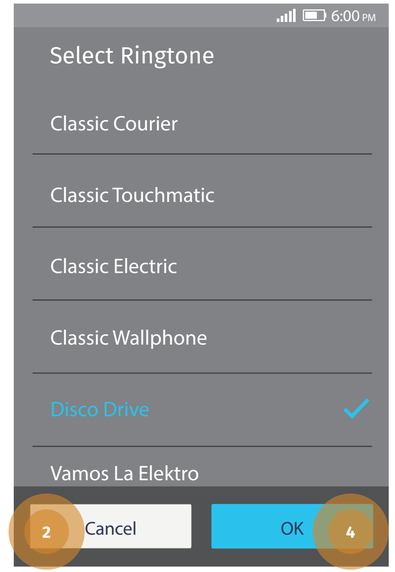


Creating a new alarm form.

The sound should be the default until the user changes.

<alarm>

3. Value Selector



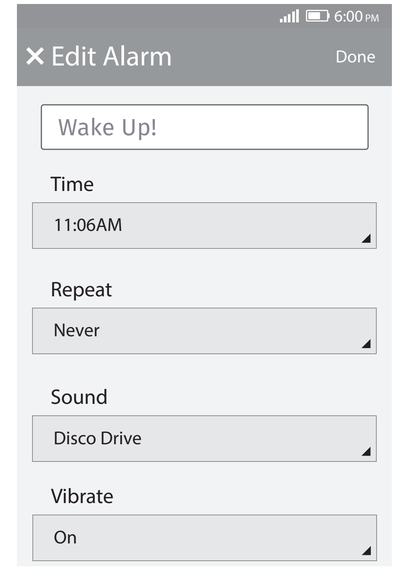
Tapping shows a value selector with possible ringtone and alert options. The current option is selected.

OK changes the sound for the alarm. Cancel returns to the form with no changes.

What kind of customizations can we make to this dialogue:
- sections for alert tones
- preview ringtone

What are the requirements for 1.5? Media ringtones team needs work session with Clock team.

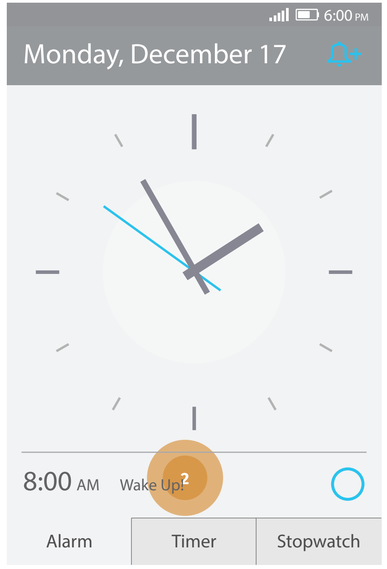
4. New Alarm



Tapping saves the changes and updates the selector with the current selection.

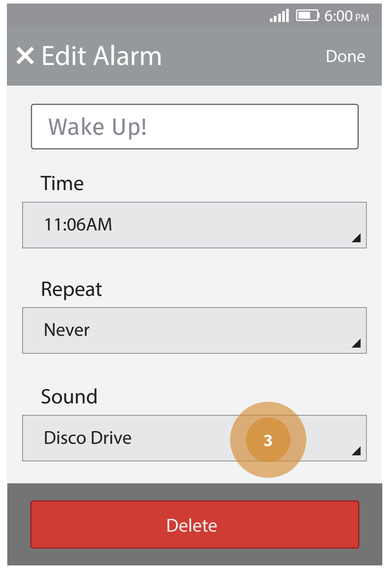
Alarm - Assign Ringtone to an Existing Alarm

1. Alarm



Clock app.

2. Alarm Details

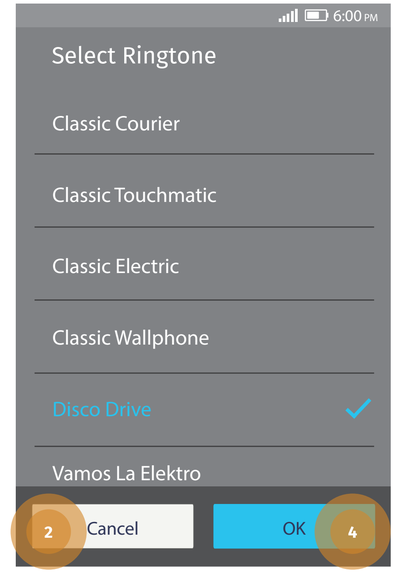


Alarm details of the selected alram.

Unless changed by the user, the sound should be the default. Otherwise the current setting is reflected.

<alarm>

3. Value Selector



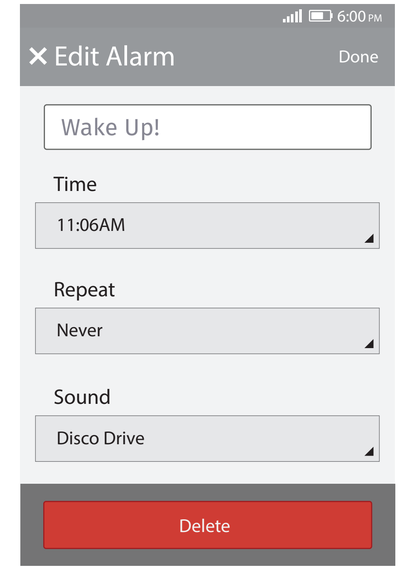
Tapping shows a value selector with possible ringtone and alert options. The current option is selected.

OK changes the sound for the alarm. Cancel returns to the form with no changes.

What kind of customizations can we make to this dialogue:
- sections for alert tones
- preview ringtone

What are the requirements for 1.5? Media ringtones team needs work session with Contacts team.

4. Alarm Details



Tapping saves the changes and updates the selector with the current selection.

Thanks!
